1. The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance with a desired state or goal. If there is a discrepancy, a problem is identified.

[illegible][illegible]

1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that are contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This involves a detailed analysis of the situation and the factors that are contributing to the problem. Once the causes of the problem are identified, the next step is to develop a plan of action. This involves determining the steps that need to be taken to solve the problem and the resources that will be required to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan of action. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in solving the problem and whether the resources have been used effectively.

2.2. Сфера и предмет исследования по существу. Показатели, характеризующие состояние здоровья населения, имеют комплексный характер. Взаимосвязь между ними не всегда очевидна. Сфера, изучаемая в исследовании, имеет комплексный характер. Взаимосвязь между ними не всегда очевидна. Сфера, изучаемая в исследовании, имеет комплексный характер.
